Private Puppy Board & Train Program

mygoldenretrieverpuppies.com

For puppies 8 weeks to 4 months old

It's not where you walk. It's who walks with you.

What to Expect From The Druid Den Training Program

Peace Of Mind

From my initial assessment and evaluation, I begin to understand your puppy's personality and temperament and develop an individual training plan. I'll be able to give you training notes and pictures of your puppy during their training stay. I have a structured daily routine that includes training sessions, socialization activities, playtime, walks and rest. Progress updates once a week to keep you in the loop and a personalized, detailed binder comes home with a lot of information and facts about your puppy.

Reward-Based Training

Obedience training is just the tool. Leadership is everything.

All programs are reward based and positively reinforced. Human emotional regulation and calm readable body language is also great for the handler (You, the new pup owner) to have or learn to have as it's extremely helpful and really matters. I use high-value training treats and toys to incentivize good behavior and good decision-making! I recommend having all of the above for when your puppy comes home.

A great Motto is "They are always learning, I am always teaching!"
